

# Personalizando Visual Studio Code

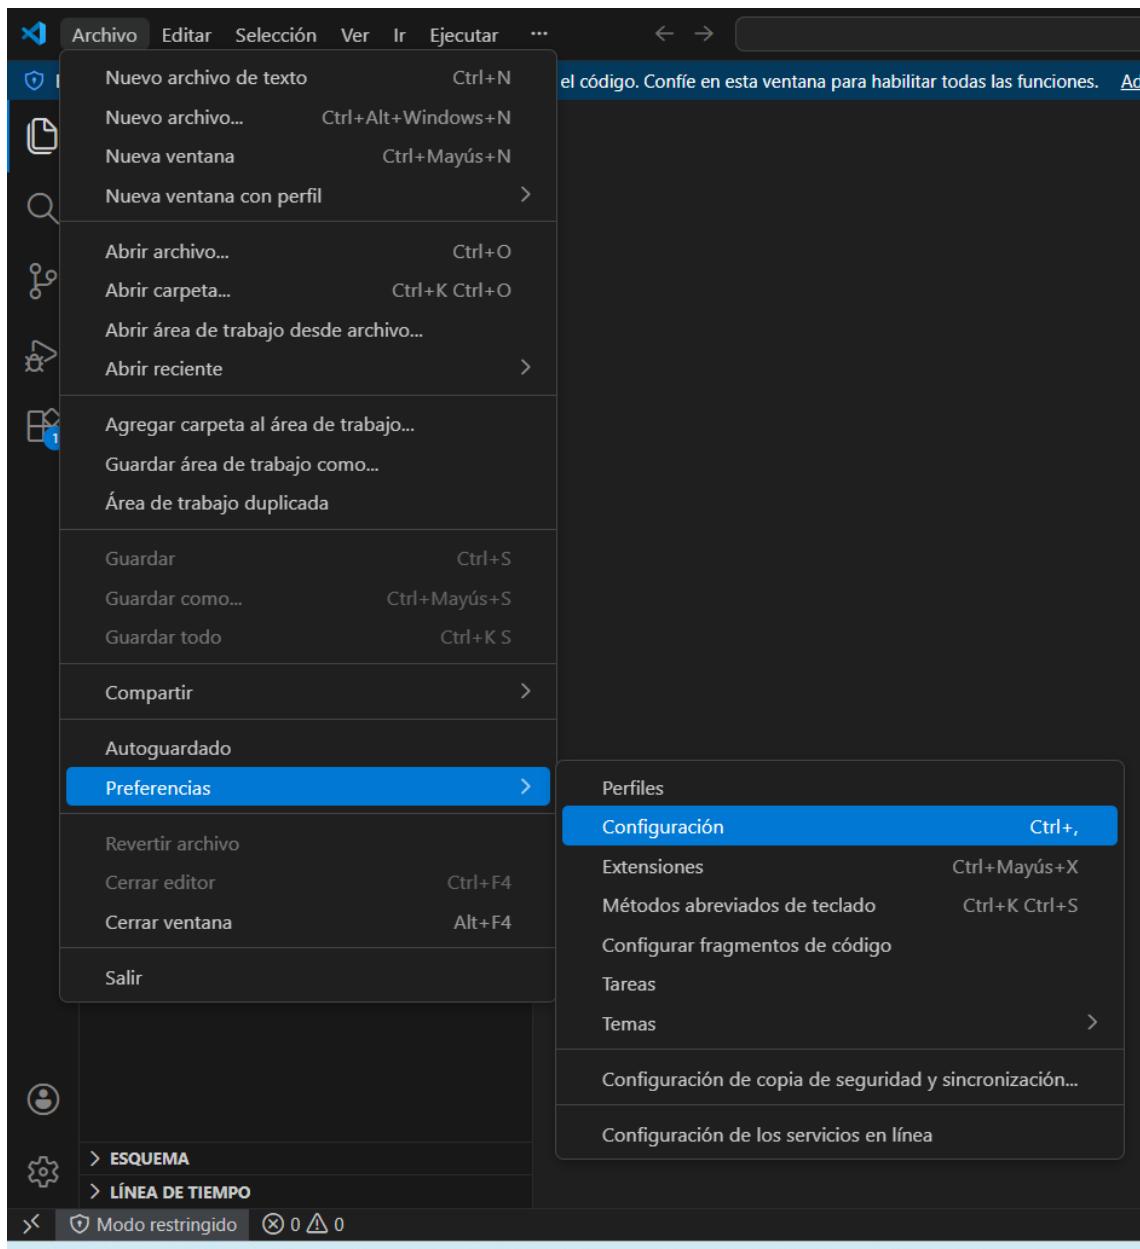

Paso Inicial: Configuración del Idioma en Visual Studio Code

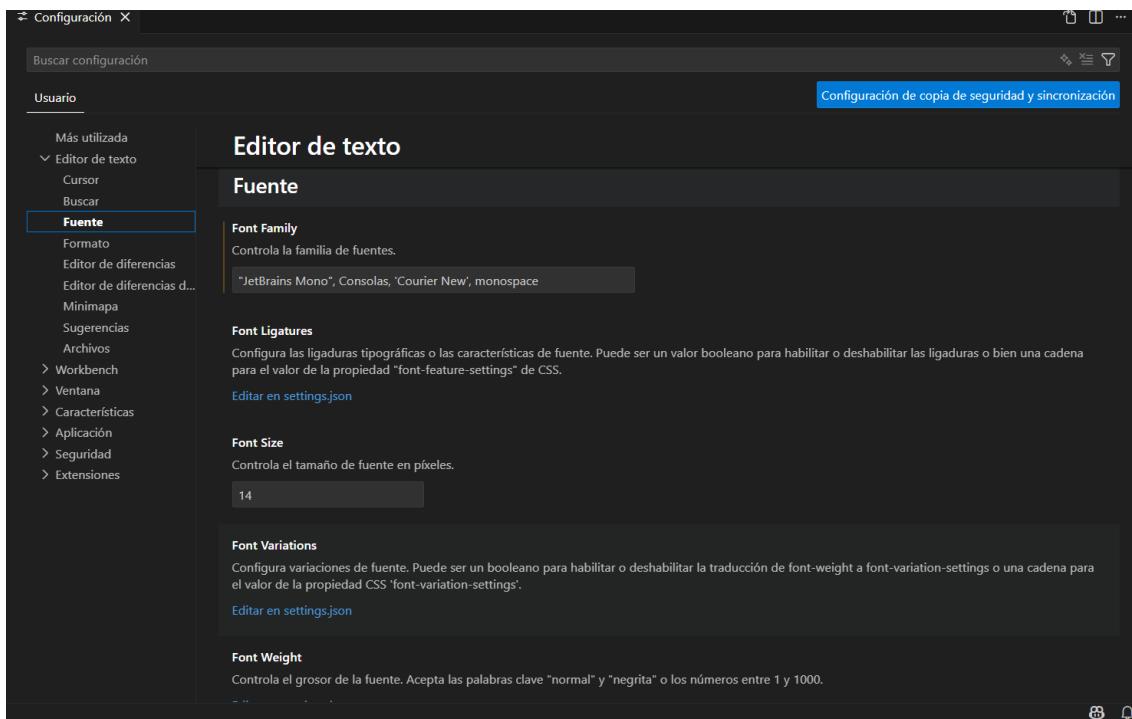

## 1. Configuración Inicial del Editor de Código

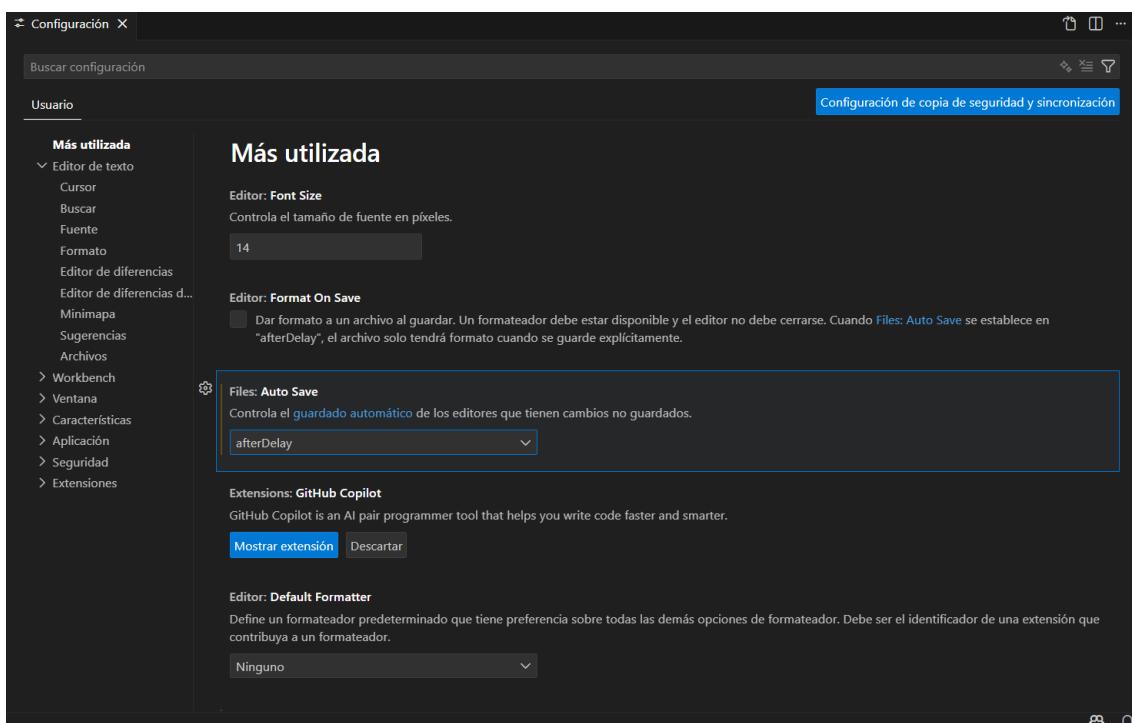

### Tema y Personalización del Editor:

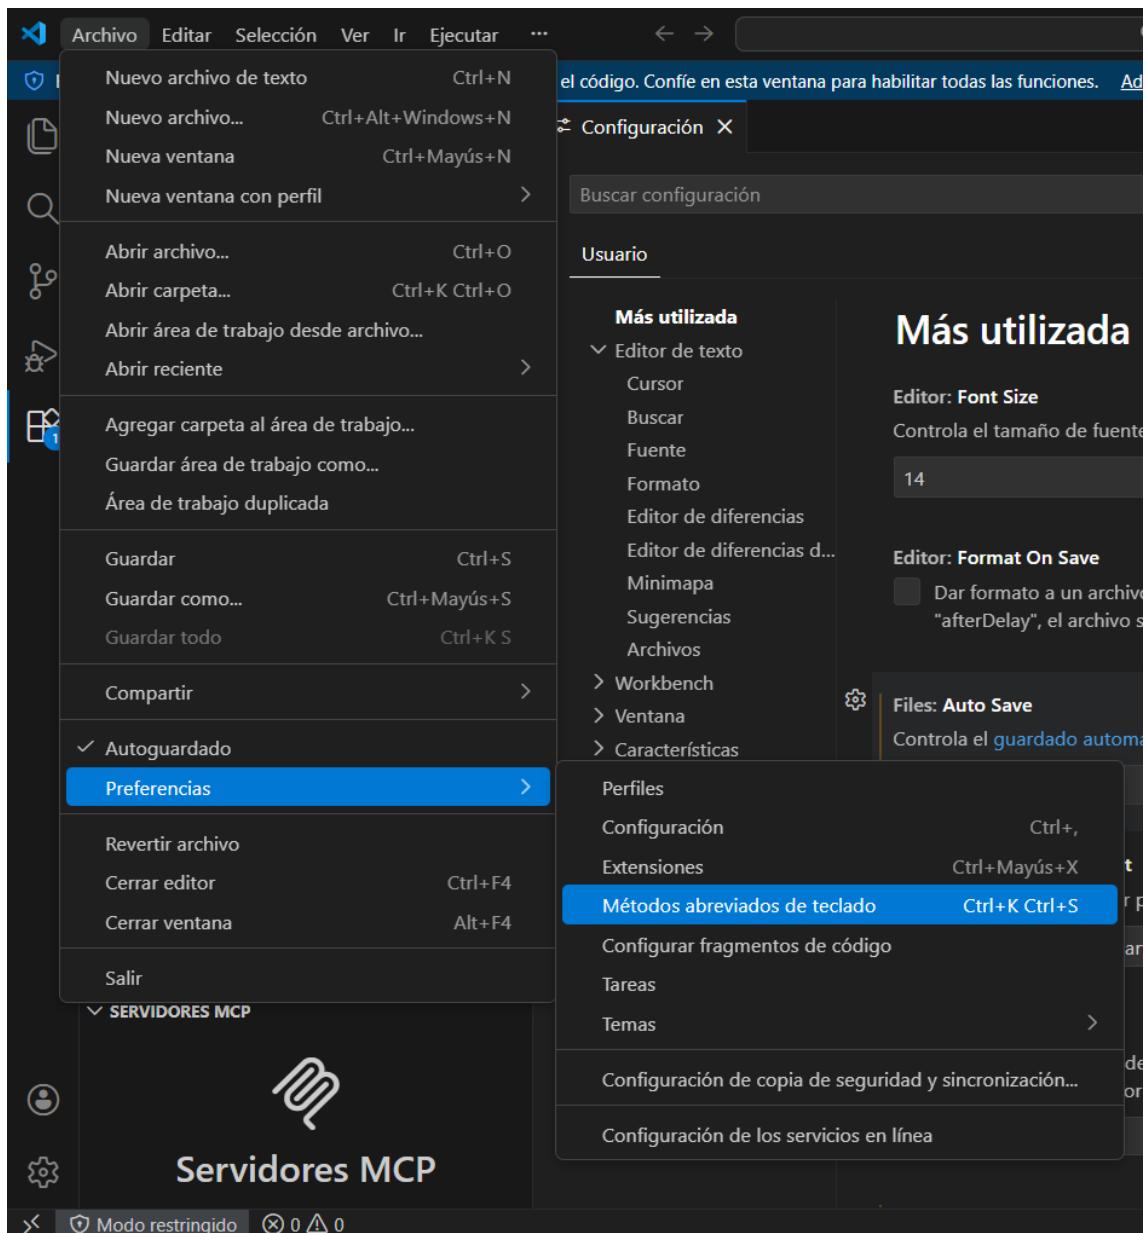

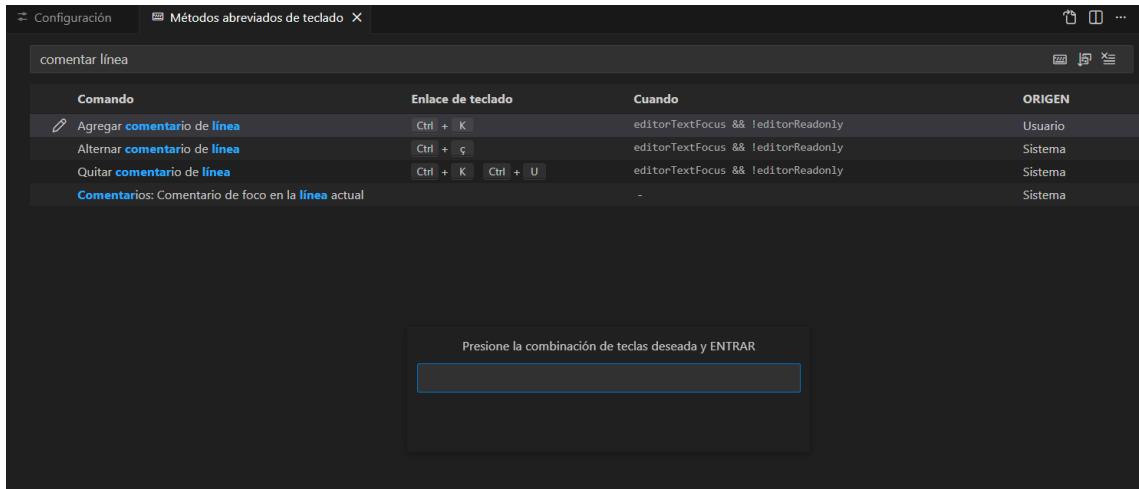

## Configurar Autosave:

## 2. Configuración de Atajos de Teclado

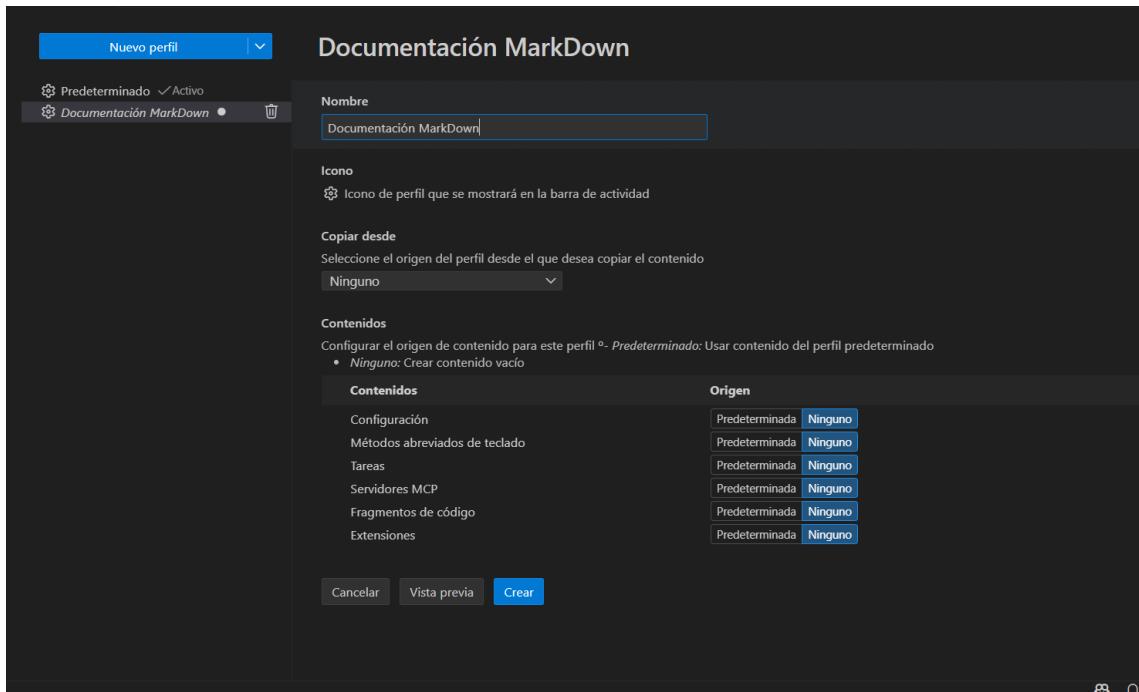

| Comando                              | Enlace de teclado      | Cuando  | ORIGEN  |
|--------------------------------------|------------------------|---|---------|
| Terminal: Crear nueva terminal       | Ctrl + Mayús + N       | terminalProcessSupported    terminalWebExtensionContributedP... | Sistema |
| Terminal: Nueva ventana del terminal | Ctrl + Mayús + Alt + N | terminalHasBeenCreated    terminalProcessSupported              | Sistema |
| Ver: Alternar Terminal               | Ctrl + Tab             | terminal.active   | Sistema |

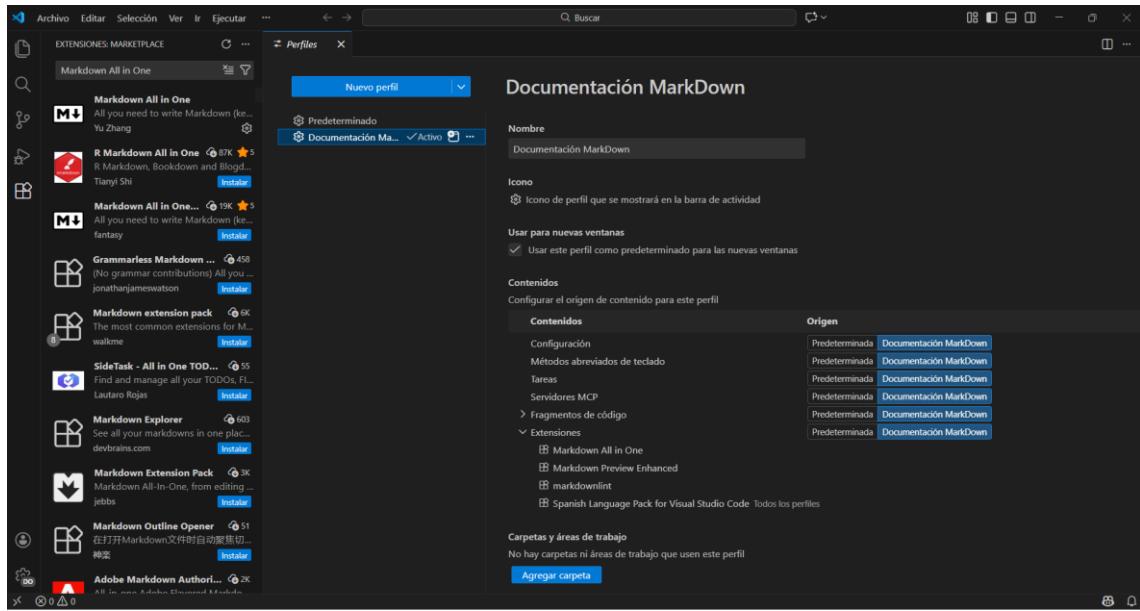

**Comando de cambiar terminal cambiado de ctrl + mayus + ñ a ctrl + ñ.**

**Comando de comentar líneas cambiado de ctrl + k y ctrl + c a solo ctrl + k.**

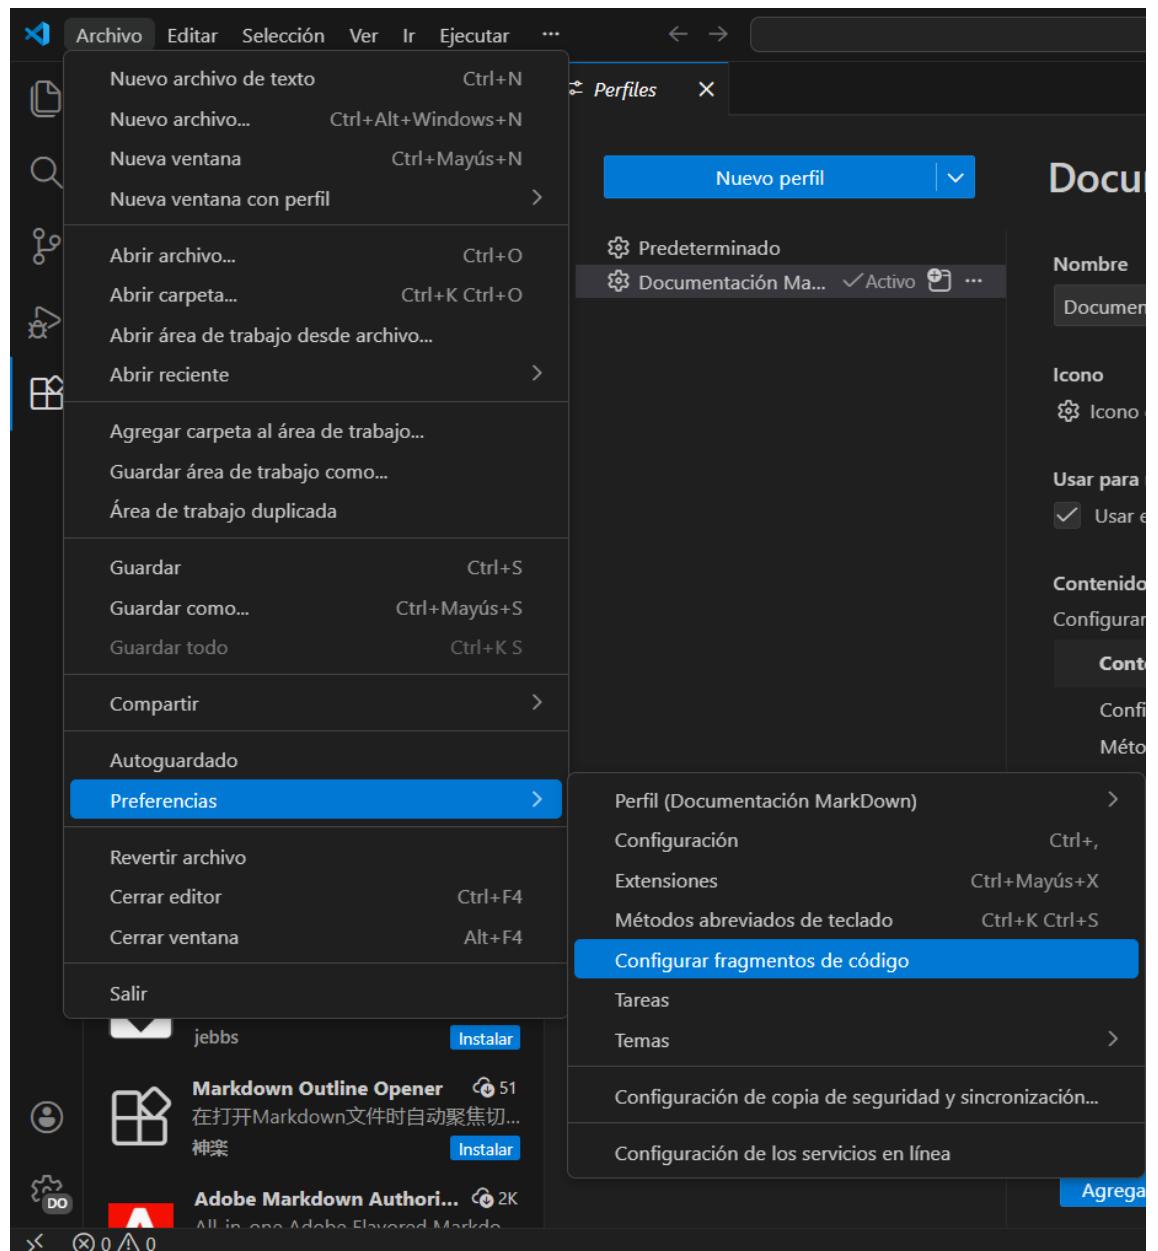

### 3. Crear y Gestionar Perfiles de Configuración

### 4. Instalación y Gestión de Extensiones

## 5. Crear y Usar Snippets de Código

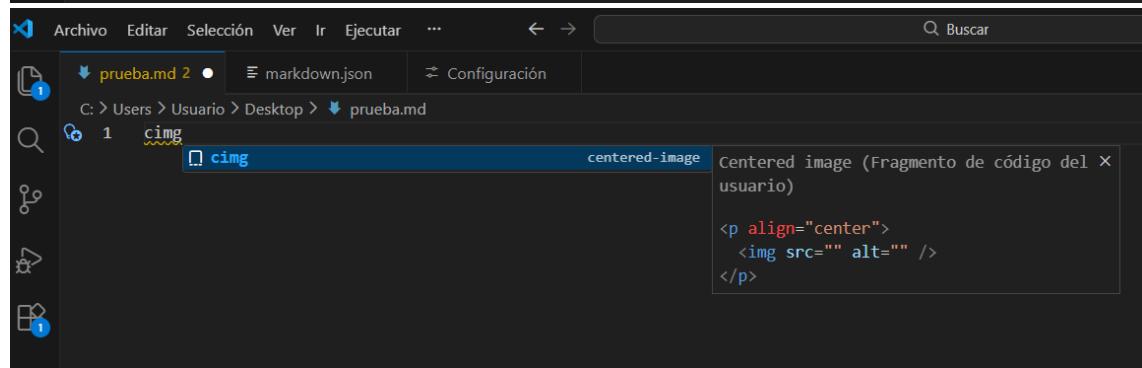

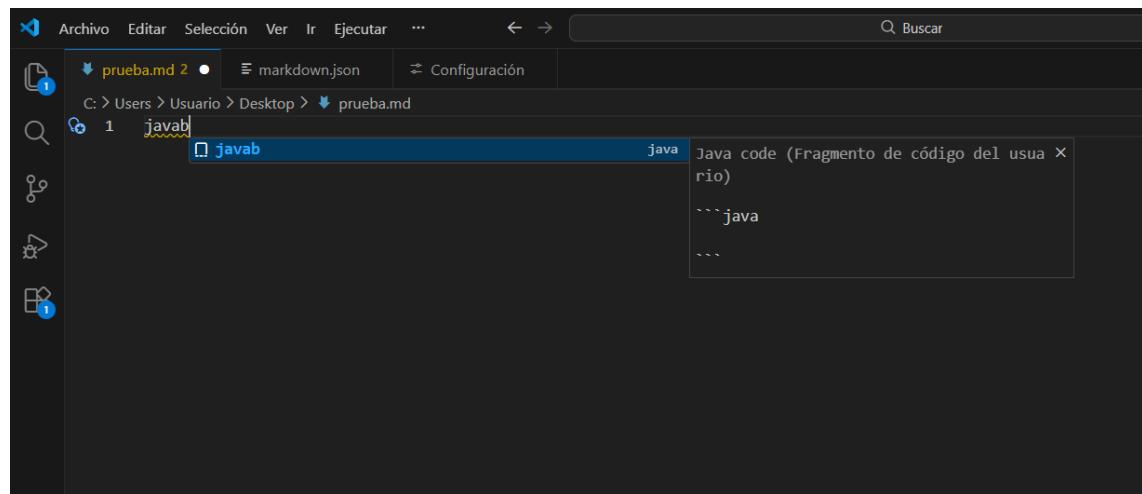

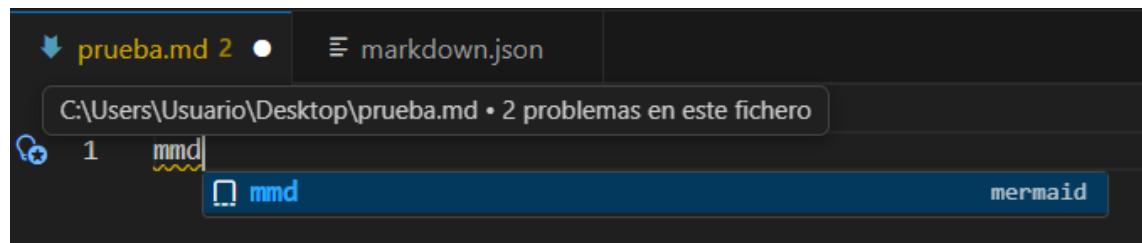

```

markdown.json 3 ●
C:\Users\Usuario\AppData\Roaming\Code\User\profiles\~7456b945\snippets\markdown.json • pets > markdown.json > {} centered-image > ** body
3 problemas en este fichero
2   // snippet for mermaid creation
3   "mermaid": {
4     "prefix": "mmd",
5     "body": "```mermaid\n\$1\n````",
6     "description": "Mermaid diagram"
7   },
8   //snippet for java code
9   "java": {
10     "prefix": "java",
11     "body": "```java\n\$1\n````",
12     "description": "Java code"
13   },
14   //snippet for centered image
15   "centered-image": [
16     {
17       "prefix": "cimg",
18       "body": "<p align='center'>\n<img src=\"$1\" alt=\"$2\" />\n</p>", "description": "Centered image"
19     }
]

```

**El archivo .json se guarda tal como esta y no se debe de mover del lugar predeterminado porque sino no funcionará.**

## 6. Configuración de la Vista del Explorador de Archivos
